

Team ATS LOGOwear

We've got a design by Cathi Cannon, one of our adventure racers and we've picked a top manufacturer of performance wear (Castelli) www.squadra.us and we're ready to go. The basic design is shown on our website at www.athletictrainingservices.com/jersey.htm – logos may vary a bit, but you'll have the idea of what they will look like.

We have minimums to meet before we can buy so we have indicated the number of pieces per line item and per Gruppo we have to meet to place an order for that item. We have an order form included and we'll require 100% down via check, VISA or MasterCard. We are told that it will take approximately 6-8 weeks after the final order is placed for receipt so get your orders in QUICK!!! Think Christmas gifts while you're at it! We won't process until we get ready to place the order. DEADLINE: AUGUST 27TH!!!!

Key Item Descriptions – All items are Castelli brand with the same high quality but at group, wholesale prices.

Cycling Jerseys are Racer cut with 3 deep pockets, high collar for increased temperature control and Momentum Fabric – the fabric we've chosen is borrowed from golf ball design to develop the newest jersey fabric. Momentum retains all the breathability of Castelli's MicroSpitech yet shows increased aerodynamic properties and gives a unique dimpled texture to the garment. We're also adding a FULL FRONT ZIPPER which most of our clients have been asking for but can't find. The long sleeved jerseys are the same fabric, but thicker for colder temps.

Wind Vest – Gamex material – A lightweight weather and wind protection. A high density knitted fabric of micro-fine polyester filament yarn. Wind and water resistant, light and supple, breathable and elastic. Compactible for easy fit into jersey pocket.

Cycling shorts - Castelli's new Modifier style – made from Stratos, an 80/20 blend of nylon and elasthane knitted from microdenier yarns has resulted in our most supple yet supportive fabric for shorts to date. A very high thread count ensures durability without the need for a bulky fabric. The silky quality of this fabric is noticeable immediately and appreciated for many miles in the saddle. Weight is 210 gr/mt2. Award winning Pro 3 pad - the best one they have and our personal favorite! All the layers of the YPRO3 pad now incorporate Castelli's full bi-elastic stretch. Vario-Thickness levels ranging from 2mm to 12mm with focused padding around the users soft-tissue areas. Top layer (against the skin) a new super-soft antibacterial layer that transports moisture away from the body. The inner layer is made of Comfortemp™ phase change foam that maintains a constant 98.6 degree temperature regardless of the rider's body heat or ambient temperature. This is the short we usually pay retail of \$190 for so grab it while you can!

Tri Wear – Same fabric as the cycling shorts, tri-specific fleece pad, zipper and pocket on top. Same cool Team ATS design.

Arm Warmers – Castelli's Thermoflex Fleece-lined lycra

Gloves – Synthetic leather, lightly padded with terry wipe on thumb. Under wrist Velcro closure.
